ENGINEERING IS THE ART OF TURNING DREAMS INTO REALITY,
CREATING, AND SOLVING PROBLEMS THAT TRANSFORM THE
WORLD. KEY MOTIVATORS INCLUDE: "SCIENTISTS DREAM
ABOUT DOING GREAT THINGS. ENGINEERS DO THEM" .

JAMES A. MICHENER.

VISION

- To succeed global standards in high-quality technical education, Research and Development in Information Technology by adapting the rapid technological advancement.

MISSION

- Making quality IT engineers with good technical proficiency by effective teaching to adapt the dynamic needs of industries.
- To take up creative research in collaboration with leading Industries and professional societies to make the nation as a knowledge-power.
- Developing the employability and entrepreneurial skills of the students by conducting industry collaborated training with the strong ethical values and professionalism to serve society with responsibility.

DEPT. HIGHLIGHTS

- The Laboratory is well equipped with 33 HP Intel Core i7 Processor Systems, 36 Dell OptiPlex 3020 Intel Core i3 Processor Systems, HP Laser Jet Printer, centralized UPS system, unlimited internet facility in an Air-Conditioned environment.
- Nodes have communication outlet with a speed of 1200 MBPS dedicated leased line facility which can be accessed in both wired and Wi-Fi environment. The department procured all latest software including Oracle 11g, Rational Rose, Microsoft Open Value Subscription through Microsoft Campus agreement to enable the students to develop their practical skills.

ABOUT THE DEPARTMENT

- We are living in a digital era, which is expected to accelerate advancements in Information and Communication Technology. This emergence has posed a great challenge to the instructional system in terms of familiarizing with emerging technologies.
- With a view of meeting this challenge, the Department of Information Technology was started at RIT in 2022. Its mission is to transform into a Centre of Excellence for education and research in Information Technology by embracing emerging technologies. Through academic excellence, collaborative research, value-added courses, and online learning platforms like NPTEL, Coursera, edx, and others, the department aims to generate highly skilled and socially conscious Information Technology professionals.
- The department provides an excellent environment for students to learn and acquire skills required by the industry. The department has experienced faculty members who are completely committed to teaching and research, as well as faculty members who are certified in specialized domains and trained in various platforms such as Infosys, NPTEL and others.
- Along with developing specific skill sets, the department association's programmes and activities seek to shape students into well-rounded individuals capable of solving real-time problems and possessing values such as discipline, truthfulness, genuineness, team spirit and dynamism.

PROGRAM EDUCATIONAL OBJECTIVES (PEOS)

- **PEO 1:** Graduates will be proficient in leading IT industries, pursue Higher study and Research, and progress as entrepreneurs by utilizing the fundamental knowledge of various streams in engineering and technology.
- **PEO 2:** Graduates will think logically and pursue lifelong learning skills to understand Technical issues related to Emerging Computing Systems and to provide prime or best solutions.
- **PEO 3:** Graduates will be able to develop system applications by understanding the importance of socially committed engineers with high ethical values, business and environmental needs in the social context.

PROGRAM SPECIFIC OUTCOMES (PSOS)

After successful completion of the degree, the students will be able to:

- **PSO1:** Apply mathematical and computing skills including Data Science and algorithms to identify and provide solutions for complex computational problems.
- **PSO2:** Develop the skills in emerging technologies such as Embedded Systems and IoT, Mobile Application Development and Security, and data analytics aids in anticipating research findings and providing the reliable IT solutions.
- **PSO3:** Apply standard Engineering practices and strategies in software projects using open source environments to deliver a quality product for business and industry attainment.

PROGRAM OUTCOMES (POS)

Engineering Graduates will be able to:

- **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

- **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to ones own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
