

### **7.1.3 Any other Relevant Information**

The college adheres to adequate waste management procedures with the necessary consent from the relevant authorities. Wastes are separated and divided into recyclable, reusable, and disposal wastes, and the required actions are then carried out in accordance for each category.

With a focus on E-Trash Management, the institution's engineering departments all feature project and product development labs where students are encouraged to complete projects using recycled electrical and electronic waste. Therefore, a sizable portion of the E-waste is recycled on campus.
