Notes:

1. Unit Test I covers the syllabus of Unit I. Internal Test I covers the syllabus of Unit I & 75% syllabus of Unit II, Unit Test II covers 25% syllabus of Unit II and syllabus of Unit III. Internal Test II covers the syllabus of Unit III & 50% syllabus of IV, and Internal Test III covers 50% syllabus of Unit IV and syllabus of Unit V.

2. The Faculty members should evaluate the Answer scripts within 4 working days from the date of conduct of Test for their subject(s) and show the valued scripts to the Students for their reference, verification of marks allotted, and signing on the front page of the script as their acceptance of the marks awarded. On the end of 4th day, the Faculty members should prepare the marks list for the subjects concerned and submit both hard copy and soft copy along with valued Answer scripts to the Exam Cell. They should email the marks list to the Class Adviser / HOD of the branch concerned and also preserve a copy in their course file(s). Class Adviser has to prepare the consolidated marks statement and submit to HOD, Exam Cell, Principal and arrange to display a copy in the Notice Board for information of Students.

3. No Retest will be conducted. However, the Students who are absent for the Test due to genuine reasons with prior permission and those who scored less than 60% of marks in any subject(s) in Unit Tests / Internal Tests shall write Retest / Improvement Test for the corresponding subject(s) to improve their marks based upon the learn-perform-score policy, by obtaining permission from faculty and Principal.

4. Each Student shall write atleast 2 Assignments and present 1 Seminar or submit 1 Innovative Miniproject work in addition to writing 2 Unit Tests, 3 Internal Tests, and 1 Model Test in each Theory course (subject). The Faculty member shall evaluate Students' Assignments, Innovative project, Seminars, etc., and award grades to encourage them improve their self-learning performance.

Academic Performance Monitoring

Academic Year : 2018 - 2019

Semester : ODD

Branch : ECE - A

Department : CSE

Subject : GE8151- Problem Solving
and Python Programming

Name of Faculty : MS.S. Manjula

Details of Students' performance in Internal Assessment Tests (For Theory Subjects only)

| Internal Assessment Test | Date of Test | Overall Pass (%)* | Deviation from Quality Policy** (Yes/No) |
|----------------------------|--------------|-------------------|--|
| I | 15-10-2018 | 70.27 | Yes |
| II | 10-11-2018 | 62.16 | Yes |
| III | 06-12-2018 | 86.11 | Yes |
| Improvement Test if any | 17-10-2018 | 78.38 | Yes |
| | 13-11-2018 | 86.49 | NO |

* For pass in each subject, the student has to score a minimum of 60%

** Deviation from Quality policy if the overall pass percentage is < 80% in IAT I, < 85% in IAT II and < 90% in IAT III.

Questions:

Part A

1. What is dictionary? [CO4,L2]
2. Differentiate between pop and popitem with example. [CO4,L2]
3. Write a program to add and modify an item in a dictionary. [CO4,L2]
4. How to get only keys from dictionary. Give an example. [CO4,L2]
5. What is the output of the following python code?

```
Dict={1:2,3:4,4:11,5:6,7:8}
print("Dict", [Dict[3]])
```

[CO4,L3]

Part B

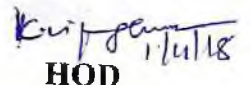

1. Write a program to print a histogram of frequencies of characters using dictionary. [CO4,L3]
2. Appraise the operations for dynamically manipulating dictionary. [CO4,L3]

CO4: The students will be able to familiarize the students to use the python data structures like lists, tuples and dictionaries.

L1: Remember; L2: Understand; L3:Apply

Course Objectives and Outcomes

Degree, Semester & Branch: I Semester B.E. ECE-A

Course Code & Title: GE8151 Problem Solving and Python Programming

Name of the Faculty member: Ms.S.Manjula, AP/CSE

Course Objectives:

1. To make the students to understand the basics of algorithmic problem solving.
2. To enable the students to read and write simple python programs.
3. To expose the students to develop python programs with conditionals, looping statement and functions.
4. To familiarize the students to use the python data structures like lists, tuples and dictionaries.
5. To enable the students to do input and output operations with files in python.

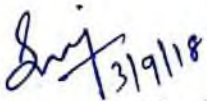

Course Outcomes:

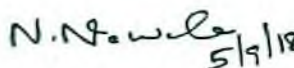

After completion of the course, it is expected that the students will be able to

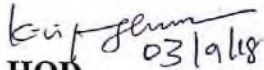

1. Develop algorithmic solutions to simple computational problems.
2. Read, write and execute simple python programs.
3. Apply control, looping structures and functions to solve problems.
4. Represent compound data using python lists, tuples, and dictionaries.
5. Read and Write data from/to files in python programs.

Assessment Methods followed:

1. Two unit tests and three internal assessment tests are conducted to assess the continuous learning.
2. Tutorials and online quizzes conducted to assess the students self-learning skills.
3. End semester examination is conducted by Anna University to assess the overall learning of the students.

OBJECTIVES:

- To know the basics of algorithmic problem solving
- To read and write simple Python programs.
- To develop Python programs with conditionals and loops.
- To define Python functions and call them.
- To use Python data structures — lists, tuples, dictionaries.
- To do input/output with files in Python.

UNIT I ALGORITHMIC PROBLEM SOLVING

9

Algorithms, building blocks of algorithms (statements, state, control flow, functions), notation (pseudo code, flow chart, programming language), algorithmic problem solving, simple strategies for developing algorithms (iteration, recursion). Illustrative problems: find minimum in a list, insert a card in a list of sorted cards, guess an integer number in a range, Towers of Hanoi.

UNIT II DATA, EXPRESSIONS, STATEMENTS

9

Python interpreter and interactive mode; values and types: int, float, boolean, string, and list; variables, expressions, statements, tuple assignment, precedence of operators, comments; modules and functions, function definition and use, flow of execution, parameters and arguments; Illustrative programs: exchange the values of two variables, circulate the values of n variables, distance between two points.

UNIT III CONTROL FLOW, FUNCTIONS

9

Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: state, while, for, break, continue, pass; Fruitful functions: return values, parameters, local and global scope, function composition, recursion; Strings: string slices, immutability, string functions and methods, string module; Lists as arrays. Illustrative programs: square root, gcd, exponentiation, sum an array of numbers, linear search, binary search. 13

UNIT IV LISTS, TUPLES, DICTIONARIES

9

Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Tuples: tuple assignment, tuple as return value; Dictionaries: operations and methods; advanced list processing - list comprehension; Illustrative programs: selection sort, insertion sort, mergesort, histogram.

UNIT V FILES, MODULES, PACKAGES

9

Files and exception: text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, packages; Illustrative programs: word count, copy file.

TOTAL: 45 PERIODS

OUTCOMES:

Upon completion of the course, students will be able to

- Develop algorithmic solutions to simple computational problems
- Read, write, execute by hand simple Python programs.
- Structure simple Python programs for solving problems.
- Decompose a Python program into functions.
- Represent compound data using Python lists, tuples, dictionaries.
- Read and write data from/to files in Python Programs.

QUESTION BANK

UNIT I - ALGORITHMIC PROBLEM SOLVING

PART A

(January 2018)

1. What is an Algorithm.

Algorithm is an ordered sequence of finite, well defined, unambiguous instructions for completing a task. Algorithm is an English-like representation of the logic which is used to solve the problem. It is a step- by-step procedure for solving a task or a problem.

2. State some of the properties of an algorithm.

- **Precision:** The instructions should be written in a precise manner.
- **Uniqueness:** The outputs of each step should be unambiguous. The instruction must be simple and concise. They must not be ambiguous.
- **Finiteness:** Not even a single instruction must be repeated infinitely.
- **Effectiveness:** The algorithm should design in such a way that it should be the most among many different ways to solve a problem.
- **Input:** The algorithm must receive an input.
- **Output:** After the algorithm gets terminated, the desired result must be obtained.
- **Generality:** The algorithm can be applied to various set of inputs.

3. State the characteristics of an algorithm.

- The instruction must be in an ordered form.
- The instruction must be simple and concise. They must not be ambiguous.
- There must be an instruction (condition) for program termination.
- The repetitive programming constructs must possess an exit condition. Otherwise, the program might run infinitely.
- The algorithm must completely and definitely solve the given problem statements.

4. What are the steps involved in algorithm development process?

- Obtain a description of the problem.
- Analyse the problem.
- Identify the solution for the problem and divide it into small task.
- Refine the Algorithm has to be prepared and adding more detail.
- Review the algorithm.
- Then it has to be executed

5. What are all the Different Approaches to Design an Algorithm?

Top-down approach starts by dividing the complex algorithm into one or more modules.

Bottom-up approach is just the reverse of top-down approach. In the bottom-up design, we start with designing the most basic or concrete modules and then proceed towards designing higher level modules.

PART – B(5×16=80 Marks)

11. a) i) Explain with an example the building blocks of an algorithm. (8)
ii) Draw a flow chart to print the first 'n' prime numbers. (8)

(OR)

- b) Explain with relevant diagrams and algorithm the Towers of Hanoi problem. (16)

12. a) i) Explain with an example the structure of a Python program. (8)
ii) Outline with an example the assignment operators supported in Python. (8)

(OR)

- b) Explain the various data types in Python. (16)

13. a) i) Write a Python program using while loop to print the first n numbers divisible by 5. (8)
ii) Write a Python program to compute the factorial of a given number. (8)

(OR)

- b) Write Python program to perform binary search. (16)

14. a) Write code snippets in Python to perform the following : (5)
i) Accessing elements of a tuple. (5)
ii) Modifying elements of a tuple. (6)
iii) Deleting elements of a tuple. (6)

(OR)

- b) Write the Python program to sort an integer list using selection sort. (16)

15. a) Describe in detail how exceptions are handled in Python. Give relevant examples. (16)

(OR)

- b) Write a Python program to copy the contents of one file to another. (16)

Allan J. McDonald:

- Allan J. McDonald – Company's Director for Solid booster rocket.
- He represented Morton – Thiokol at the Cape Kennedy.
- He knows the behavior of O – Rings at freezing temperatures.
- He arranged a Teleconference so that NASA Engineers could discuss with his company Engineers.

Arnold Thompson & Roger Boisjoly:

- They are the seal experts of Morton – Thiokol.
- They explained how the O-ring will erode when the temperature becomes low at the conference.

Engineering managers:

- Bob Lund – Vice President of Engineering.
- Joe Kilminster – Vice President for Booster Rockets.
- The Engineering managers agreed that there is a problem of safety.
- The team from Marshall Space Center did not agree because they do not want the launch to be postponed.
- Jerry mason, Senior Vice president told Bob Lund “To take off your engineering hat and put on your management hat”.
- The managers of Thiokol – Morton decided not to recommend that O- Rings are unsafe.
- The engineer's judgment was not considered weighty.
- At Cape Kennedy – Allan McDonald refused to sign the formal recommendation to launch. It was then signed by Joe Kilminster.

Ethical issues in the Challengers Case:

- Concern for safety gave way to institutional posturing.
- Danger signal did not go beyond Morton – Thiokol and Marshall Space Flight center.
- No effective recall was instituted.
- There were concerned Engineers who spoke out, but ultimately they felt it only proper to submit to manage decisions.

THE INCIDENT

JANUARY 28, 1986

Launch

About 80 seconds after Launch

The shuttle consists of an orbiter (which carries the crew and has powerful engines in the back), a large liquid-fuel tank for the orbiter engines, and a solid-fuel booster rockets mounted on the sides of the central tank.

Where these segments mate, each joint is sealed by two rubber O-rings as shown above. In the case of the Challenger accident, one of these joints leaked, and a torch-like flame burned through the side of the booster rocket.

Guest Lecture on Internet of Things

The Department of Electronics and Communication Engineering of Ramco Institute of Technology has organized the guest lecture on Internet of things on 20.04.2016 at 04.00pm in the ECE seminar hall.

Dr.S.Periyanayagi,(HOD Incharge / ECE department) formally welcomed all the dignitaries on the dais, staff members and students of ECE department.

The Chief Guest, Mr. Prasanna Shankar, Academic Program Manager, ANSYS, Bangalore, was honoured by Dr.S.Periyanayagi,(Head Incharge/ECE department).

Ms. T.S.Rashmica, II year ECE B section, introduced the chief guest to the audience.

Mr. Prasanna Shankar, Academic Program Manager, ANSYS, Bangalore, delivered the role of Internet of Things and he described the impact of IOT in upcoming years.

A Guest Lecture by Mr. Prasanna Shankar, Academic Program Manager, ANSYS, Bangalore on "Simulation Driven Product Development using IoT" was delivered on April 20th, 2016 for the students of B.E. III year ECE and III year CSE.

He initiated his lecture session with overview of IoT (Internet of Things) and his was emphasis more on applications in area of IoT. The session was made interactive by thought provoking questions posed by Mr. Prasanna Shankar to the student audience. For which convincing answers were given by the student audience.

At the end, Ms. J.Taj Din Irfana, III year ECE proposed the vote of thanks. She thanked the invited guests for gracing the occasion by their solemn presence and to all the volunteers.

Description:

" A Popular knowledge sharing platform, bulit over Python"

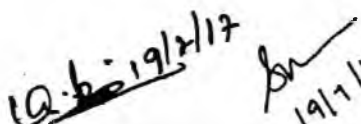

The C/C++ programming languages dominate embedded systems programming, though they have a number of disadvantages. Python, on the other hand, has many strengths that make it a great language for embedded system.

Python is an interpreted language. Python become one of the most popular open source programming languages. All Python releases are open source and freely usable and distributable, even for commercial projects.

Registration fee: Rs.300 per participant.

Registration: Online/On spot.

Respected Sir,

Sub: Requesting permission to conduct workshop on 'Python for Embedded systems' - During TECHYUGA'17 and collecting money from participants- reg.

We are planning to organize a workshop on "Python for Embedded systems" during "TECHYUGA'17" on 13.08.17.

In this regard, we have discussed with one of the leading training provider namely **M/s. Enthu Technology Solutions India Pvt. Ltd., Coimbatore**. They have accepted to conduct workshop in our campus for the amount of Rs.250/- per participant. The payment mode is by cash. They will depute three trainers for conducting the workshop.

We are planning to conduct this workshop in Digital Signal Processing Lab. We expect around 70 (External + Internal) participants for this course.

Hereby we request you to kindly grant permission to conduct this workshop during "TECHYUGA'17", on 13.08.2017 and to collect the course fee of Rs.300/- per participant. Your kind approval is requested in this regard.

PERFORMANCE COMPARISON OF EQUALIZERS FOR WIRELESS COMMUNICATION SYSTEM

One of the important techniques, which can combat and exploit the frequency-selectivity of the wireless channel in providing high data rate wireless systems, lie in the hand of equalization. The wireless systems that is evolved in the last few decades necessitates in the design and analysis of equalization techniques. The current trend as well as the future generation of wireless systems is supposed to possess very high spectral efficiency, presence of rapidly time varying channels due to high mobility and the availability of partial or no channel state information at the transmitter and/or receiver which prescribes MIMO systems. When the data is transmitted at high bit rates, over mobile radio channels, the channel impulse response can extend over many symbol periods, which lead to Inter-symbol interference (ISI). This paper analyses the performances of equalization techniques by considering 2 transmit and 2 receive antenna (2x2 MIMO) over a flat fading Rayleigh multipath channel and provides a bit error rate analysis of the same.

Security is the first and foremost concern in many networking scenarios which replaces the performance rapidly. The aspects of wireless sensor network security are described by challenges, requirements, defense techniques and possible attacks. The main aim of the paper is to provide a general overview of sensor networking security and highlight the need for efficient defense techniques able to withstand various attacks that target their confidentiality, functionality and availability. A defense technique based on swarm intelligence for certain attacks like jamming attack and denial of sleep attack has been proposed to detect these vulnerabilities for IEEE802.15.4 based WSN. Simulation results reveal the effectiveness of the proposed system.

ABOUT THE INDUSTRY:

Bharat Sanchar Nigam Limited (abbreviated **BSNL**) is an Indian state-owned telecommunications company headquartered in New Delhi. It was incorporated on 15 September 2000 and assumed the business of providing telecom services and network management from the erstwhile Central Government Departments of Telecom Services (DTS) and Telecom Operations (DTO) as of 1 October 2000 on a going-concern basis. It is the largest provider of fixed telephony and broadband services with more than 60% market share, and is the fifth largest mobile telephony provider in India. BSNL is India's oldest communication service provider and had a customer base of 93.29 million as of June 2015. It has footprints throughout India, except for Mumbai and New Delhi, where telecommunications are managed by Mahanagar Telephone Nigam (MTNL).

In first day of our visit,we visited BSS (Base Station Subsystem). The Base Station Subsystem (BSS) is the section of a traditional cellular telephone network which is responsible for handling traffic and signaling between a mobile phone and the network switching subsystem. The BSS carries out transcoding of speech channels, allocation of radio channels to mobile phones, paging, transmission and reception over the air interface and many other tasks related to the radio network. The base transceiver station, or BTS, contains the equipment for transmitting and receiving radio signals (transceivers), antennas, and equipment for encrypting and decrypting communications with the base station controller (BSC). Typically a BTS for anything other than a picocell will have several transceivers (TRXs) which allow it to serve several different frequencies and different sectors of the cell (in the case of sectorised base stations).This BSNL Division has 4 BSS.

Sir,

Sub: Requisition for permission to undergo in-plant training programme in your organization for our faculty members - regarding.

We wish to inform you that our faculty members of Computer Science and Engineering are interested in attending in-plant training programme in your esteemed organization preferably during the period between 22.05.17 and 04.06.17. We feel it will be fruitful if the faculty members with academic background have a glimpse of the industry in order to have a better appreciation of practical applications of theory.

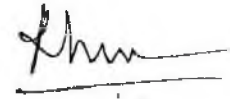

In this context, we request you to kindly give permission for undergoing training to enrich the knowledge about latest technological advancements in your esteemed organization during the above mentioned period of 3 days on mutually convenient dates, as per your norms. We shall be grateful to you for a favourable response. Herewith we have furnished the list of faculty members who are interested to attend the in-plant training.

Thanking you,

Yours faithfully,
