

RIT Incubation Centre

RIT Incubation centre is a platform in which we are committed to provide all the facilities which are required for the startup communities. In incubation center we are committed to provide the following facilities:

Individual office space for the incubate with all the facilities like individual table with seating arrangements for the entire team, landline, high speed internet facilities, common photo copying machine, printer, pure drinking water facility, pantry for cooking light food and a meeting hall with all the facilities.

Our incubation centre would be open for everyone, i.e. for our students, faculty members.

As a Institution, our incubates are going to get the facility of state of the art different labs facilities, computer labs and instant mentoring support from our well educated and experienced teaching staff.

At our incubation center we are providing mentoring support and consultation support to all the incubates in identification of opportunities, brain storming, prototyping, making products and commercialization.

As a incubation center we are providing seed funding support to our students if their projects are really innovative.
