Chief Guest/ Guest of Honor: Nil
Designation: Nil

Speakers: Nil

Report

(maximum 250 words)

The Department of Mechanical Engineering, in partnership with the IE(I) Mechanical Chapter, organized an inspiring “Film Show” on the theme "Sustainable Developmental Activities" on October 24, 2024. This event aimed to promote awareness and encourage discussions on sustainable practices within engineering and beyond. A total of 20 students attended the event, gaining valuable insights into how engineering can contribute to sustainable development.

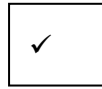

Two films were nominated for the screening, each showcasing unique perspectives on sustainability. One film was created by the students from the Department of Artificial Intelligence and Data Science, while the other was a collaborative project by students from the Mechanical Engineering Department. The films explored a range of topics, from innovative AI solutions for environmental conservation to mechanical advancements that support eco-friendly practices. These visual presentations allowed students to witness the interdisciplinary approach necessary for sustainable solutions.

Mr. S. Valai Ganesh, Assistant Professor (Senior Grade) in Mechanical Engineering, served as the faculty coordinator for the event, ensuring the program's success and enriching the learning experience for attendees. Mr. V. Suryakumar, a fourth-year mechanical engineering student, played a crucial role as the student coordinator, assisting with event arrangements and facilitating the post-screening discussion, where students shared reflections and ideas inspired by the films.

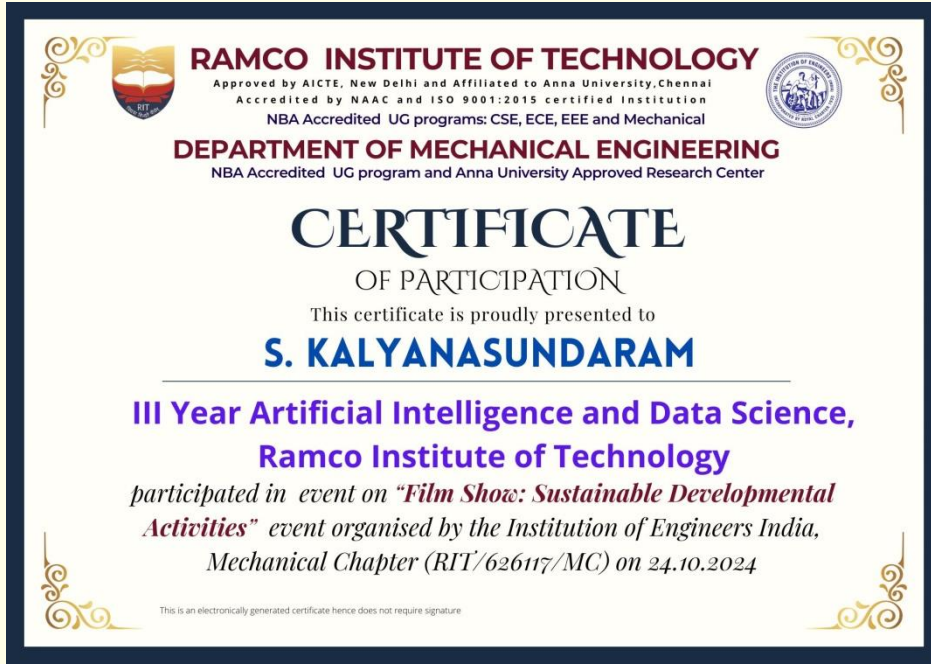

The event underscored the department's commitment to fostering a holistic educational environment where students can engage with critical global issues like sustainability, preparing them to be responsible and innovative engineers of the future.
