

**Department of Mechanical Engineering
Academic Year 2021 – 2022 (Odd Semester)**

Degree, Semester & Branch: VII Semester B.E Mechanical Engineering

Course Code & Title: ME8791 & Mechatronics

Name of the Faculty member (s): Mr.T.Selvasundar, AP/Mechanical,

S.Valai Ganesh, AP/Mechanical

Innovative Practice Description

- **Unit / Topic:** Unit II / 8085 Microprocessor Instruction Set
- **Course Outcome:** CO2
- **Topic Learning Outcome:** TLO5
- **Activity Chosen:** Activity based learning- 8085 Microprocessor Instruction Set
- **Justification:**

In the Unit-II (8085 Microprocessor and 8051 Microcontroller) of the subject ME8791 Mechatronics syllabus there is a separate portion which explains the architecture, pin diagram, addressing mode and instruction sets of 8085 Microprocessor. Students are explained these concepts using the 8085 Microprocessor kit available in the Mechatronics Laboratory. For better understanding and easy remembering of the instructions and their functions students are involved in a classroom based activity in which students will be able to remember, recall the function of the given instruction of the 8085 Microprocessor.

- **Time Allotted for the Activity:** 15 Minutes (22.09.2021)
- **Details of the Implementation:**

Initially teams were formed each team had two students. Sheet has circulated to all teams containing different types of Instruction set. They have to identify the instruction which is asked in the sheet that comes under which type of instruction set. Normally 8085 has 246 numbers of instructions and it can be classified into five different types.

- **CO – PO / PSO mapping:**

| CO | PO 1 | PO 9 | PO 12 |
|------|------|------|-------|
| CO 2 | 2 | 2 | 1 |

(1 – Low 2 – Moderate 3 – High)

ME8791 Mechatronics

VII Semester A Section (2021 – 2022)

Activity based learning- 8085 Microprocessor Instruction Set

22.09.2021

| Sl.No | Instruction | Identify the Category and operation |
|-------|--------------------|---|
| 1. | LXI SP, 8 bit data | Data transfer instruction 8085 bit data ✓ |
| 2. | MVI R, FFH | Data transfer instruction R ← FFH ✓ |
| 3. | ADC M | Arithmetic instruction A ← A + M ✓ |
| 4. | INR rp | Arithmetic instruction rp ← rp + 1 ✓ |
| 5. | CMP R | Logical instruction A - R ✓ |
| 6. | RLC | Logical instruction rotate left without carry ✓ |
| 7. | STC | Logical instruction set carry flag ✓ |
| 8. | JPE | Branching instruction jump if parity even ✓ |
| 9. | CM | Branching instruction call memory address ✓ |
| 10. | RZ | Branching instruction return ✓ |
| 11. | IN 8 bit data | Initial input operation of information ✓ |
| 12. | EI | Enable Interrupt (Interrupt Enable) ✓ |

• Reflective Critique:

❖ Feedback of practice from students and other stakeholders:

This kind of activity is very useful to check our level of understanding about the instruction set and it helps us to categorize the types of instruction.

❖ Benefit of the practice:

The students will be able to describe the functions of the Microprocessor 8085 and their interface and students will be able to remember the instruction set of 8085 Microprocessor easily.

❖ Challenges faced in implementation:

This activity based learning was conducted in a neat manner and challenges faced to implement this activity were a separate instruction set sheet was circulated to all teams and marks awarded based on their involvement and correct answer.
